

Baseline eCTD Submission Requirements

V 1.0

Central Registration
Gulf Health Council

Glossary

Applicant	The company or its representative.
Drug	An article intended for use in the diagnosis, cure mitigation, treatment, or prevention of disease and which is intended to affect the structure or function of the body.
Common Technical Document (CTD)	An international harmonized format for submissions for approval of pharmaceuticals for human use. The CTD provides a standardization of the presentation of the content.
Drug Application	Drug application includes the application form, the product file and the drug samples.
Variation	A process of informing the authority of any minor or major changes in the drug product.
Renewal of marketing authorization	A process of renewing the marketing authorization license every five years.
Regulatory activity	A collection of sequences covering the start to the end of a specific business process.
Sequence	Electronic documents supplied at one particular time by the applicant as a part of, or the complete drug file.

Introduction

According to the GHC Central Registration's *eCTD implementation plan*, the eCTD is mandatory from the 3rd of January 2015. This applies only to human drug applications.

Technical Baseline Application and Timeline

A baseline submission is a compiled submission of the current status of the dossier, i.e. resubmission of currently valid documents that have already been provided to GCC Member States. Where an eCTD application is being used for the first time as variation or renewal application, applicants are obliged to submit a technical baseline for the product as this will greatly facilitate the review process.

It should be clearly stated in the **cover letter** of the “**baseline eCTD sequence**” that the content of the previously submitted dossier to GCC Member States has not been changed, only the format. However, there shall not be full assessment of the baseline submissions and hyperlinks between documents are not necessary. The submission unit ‘*reformat*’ should be used in the envelope for the baseline sequence and submission type should be “none”.

Baseline eCTD Submission

One of the principles of eCTD is that with the use of the operation attributes, it is possible to manage the lifecycle of a product and generate a view of the “current dossier”.

To convert from CTD or NeeS format to eCTD, a *baseline* needs to be submitted. A baseline submission is the resubmission of currently valid documents to start the eCTD life cycle.

An eCTD baseline should not contain any *new* information as it will not be subject to review.

Submission of a baseline shall be after the *end* of a regulatory activity. i.e. the company will follow the same original submission for products under assessment until the end of the regulatory activity.

Baseline Starting as Sequence 0000

For product files that are submitted as CTD or NeeS, the baseline submission should be submitted as sequence (0000). However, in some cases e.g. renewal and variation submitted as eCTD, the submission *could* continue to the next sequence of the submission life cycle.

The baseline should always be a separate submission.

Baseline Cases

1- For products submitted as NeeS/CTD:

If the product was submitted as NeeS/CTD and has no regulatory activity or complete regulatory activity, a baseline shall be submitted as sequence 0000. The first regulatory activity after baseline (for example a variation request) shall be submitted as sequence 0001. For the next submissions, the sequence number will advance, 0002, 0003, etc. See table below.

Sequence No.	Submission description	Submission type	Submission Unit	Related sequence
0005	Response to Question	NeeS/CTD	-	-
0000	Baseline submission	none	reformat	
0001	Variation	var-type2		
0002	Response to Questions	var-type2	response	0001

Table 1: Example for starting an eCTD with a baseline sequence

2-For products submitted as eCTD for renewal or variation:

Products submitted as eCTD submission, and are approved by GCC with no ongoing regulatory activity, the baseline sequence may continue from the last one. Table 2 demonstrate more on this case.

Sequence No.	Submission description	Submission type	Submission Unit	Related sequence
0000	Renewal	renewal		
0001	Response to Questions	renewal		0000
0002	Response to Questions	renewal		0000
0003	Variation	var		
0004	Response to Questions	var		0003
0005	Baseline Submission	none	reformat	

Table 2: Example for starting a baseline with a regulatory activity

Components of an eCTD Baseline Submission:

It is composed of the currently valid documents in an eCTD format. Refer to the following table for more details.

References:

Section	Requirements
Module 1	Regional Administrative Information
1.0	Cover letter
1.2	Application Form ¹
1.3	Product Information
1.3.1	Summary of Product Characteristics (SPC)
1.3.2	Labeling
1.3.3	Patient information leaflet (PIL)
1.3.3.1	Arabic leaflet
1.3.3.2	English leaflet
1.3.4	Artwork (Mock-ups)
1.7	Certificates and Documents
1.7.2	CPP or Free-sales
Module 3	Quality
3.2.S	Drug Substance
3.2.P	Drug Product
3.2.A	Appendices

The cover letter should include **declaration** that indicates there is **no new information**, only the format dossier has changed.

¹ The application form submitted shall be the last valid application form
